About us

OMNI Sports International Sdn Bhd ("OMNI Sports") was established in 2018.

OMNI Sports is an organisation dedicated to the provision and promotion of sports. Running through everything we do are very simple goals and beliefs that help us achieve these. Whether the youngest participant is taking their first steps on a gymnastics mat or elite basketballers being mentored by professional athletes, the same ethos governs all coaching.

The benefits of an actively healthy lifestyle are well-known and regularly repeated. But how does OMNI Sports ensure that everyone adheres to this advice? By making sure all activities, events and classes are serious fun, always and everytime. Not only are coaches, assistants and staff dedicated experienced sports people, they are also trained in the provision of good, effective and enjoyable sessions.

Our values

When OMNI Sports coaches plan a session, they stick to the core ethos. Always using the founding mission statement to create fun and engaging sessions.

- **Vision** - To build a brighter future of empowered and healthy people through sports.
- **Intention** - To provide a safe and nurturing environment.
- **Commitment** - To deliver fun, engaging programs, whatever the content subject or sport.

Our service

Facility management

Facility management involves keeping facilities in the best possible shape by maintaining, repairing, modernising or enhancing facility assets to serve the organisations/company's core goals. When considering the time and effort requirements as well as the possible financial demands on organisation, facility management might seem like a very difficult assignment.

Due to the growing demands placed on sport organisation, higher management must take the time to think through and put facilities management plans in practice to assure service delivery, adaptability to emerging trends and most importantly, community sustainability.

OMNI Sports' role as the facility manager is to oversee the management, maintenance, and safe and effective operation of the facility assets for the benefit of the establishment. Repairs and maintenance, security, cleaning and more complex technological needs that may be part of the system. The ability to plan ahead, predict changing situations and alter services as necessary for social participation or financial reasons are requirements for facility managers.

Together with our potential clients, we will plan, organise and produce sport events such as tournaments, sport corporate competition, school & community sports projects. Our services offer event programming, facilitation management which includes hiring out and sourcing of people to rent the venue, ground-maintenance, security and crowd control during the event and after event clean-up operations.
